Technoverse Hackathon

2026

Instructions for idea submission (step 02)

- All teams must submit ideas as per the guidelines outlined in this document (refer slides 4 & 5).
- Ideas must be submitted only in PDF format, using the prescribed template (refer slides 7 & 8).
- Teams may include additional supporting details within the same PDF, as applicable.
- The idea submission platform (PDF upload) will be open from 7th April to 12th April.
- Ensure your idea is submitted before the deadline(12th April).

Structure for submitting ideas

WHY

Explain the Problem

Problem Description & Business Scenario : Include relevant background information, data or context that helps to understand the problem significance and impact. Talk about the Industry and business trends, needs & scenario
Problem Scope: Define the boundary and scope of the problem, specify any limitations or specific requirement.
Target Users/Stakeholders: Identify the target users or stakeholders who would benefit from the solution. Describe their needs, pain points that solution addresses.

How

Explain the Solve

Solution Overview: Provide high level overview of the solution, explaining its core concepts and how it addresses the problem. Describe solution features, functionalities and main components of the solution.
Technical Details: Provide technical information around the solution, this may include underlying technologies, platforms, programming languages, frameworks, algorithms, libraries used. Explain the data sources and integration/interoperability considerations with systems.
Innovation: Highlight unique or innovative aspects of the solution, emphasize any novel technologies, methodology or strategies employed.
Market Potential: Provide approx. Market potential, bring in facts and figures from research & analyst reports (if possible).
Why are the technologies you used are appealing for the solution: Explain why technologies used for the use case are relevant for the use case.

WHAT

Value proposition

Enumerate the primary benefits or advantages of the solution with specific metrics or data points to quantify the benefits in terms of user experience, efficiency, time and cost savings, flexibility, scalability, social and environmental impact.

Additional Context *(please provide additional details as applicable in your case)*

Investments

What does it take & How much does it cost to solve?

Cloud

Process Re-engg

Modernization

AI

Tools

ROI

Revenue Growth

Happy Customer

Margin improvement

Employee Experience

Returns

Quantify the benefits & What if I don't solve?

Timelines

Time to realize benefits

Time to solve
